NORMATEC

PULSE RAPID RECOVERY THERAPY

RECOVER • FASTER

What Is Normatec?

NormaTec is the leader in rapid recovery- giving a competitive edge to the world's athletes, coaches and trainers. The system includes a control unit and attachments which are like giant compression sleeves that go around your legs, arms and hips. The sleeves use compressed air to massage your limbs, mobilize fluid, increase blood and oxygen flow, and speed recovery using a pulsing pattern. When you use the system, you first experience a pre-inflate cycle, during which the connected attachments are molded to your exact leg shape. The session will then begin to compress your feet and gradually works its way up your entire leg. Similar to the kneading and stroking done during a massage, each segment of the compression sleeve will compress in a pulsing manner and then release. This will repeat for each segment of the attachment until the pattern, again, works its way up your limb.

Is it Safe?

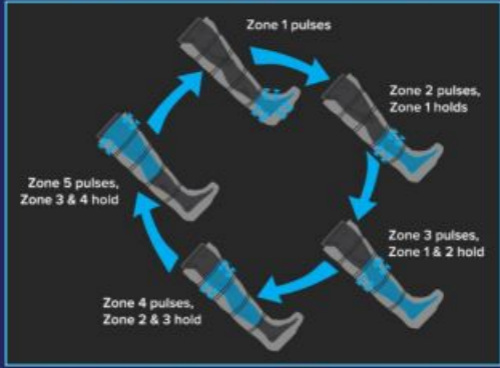

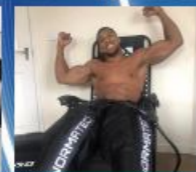

Yes! Absolutely! As we mentioned before, it is increasing oxygen, blood and fluid flow.

Why does it Work?

NormaTec is great for many reasons. It is an overall neuropathy treatment option so it helps nerve pain, nerve damage and anything else related to surrounding nerves. It also helps patients with diabetes and cancer. NormaTec improves muscle recovery, blood circulation issues, decreases inflammation and swelling, improves overall healing for any surgeries or breaks, and creates more oxygen in the body.
